- Standard thickness: 4 mm and 6 mm
- Standard size: 3210 x 2250 / 2500 mm

Some of the colors shown in this catalog may differ from the actual color because of the printing technique. Therefore please compare your choice with a Rainbow sample.

- The painted side of the glass should be applied on a surface.
- Where safety is a requirement a polypropylene film must be applied to the varnished side to keep splinters in place therefore minimizing the risk of injury caused by broken glass.
- Can be edgeworked or drilled.
- Cannot be tempered or laminated.
- The painted side of the glass should not contact with water.
